

6th Grade
Pg. 99 (3-8)

In 3–8, solve each equation and check your answer.

3. $g - 8 = 25$

$$\square = \square + \square$$
$$\square = \square$$

4. $25 + y = 42$

$$\square = \square - \square$$
$$\square = \square$$

5. $r + 82 = 97$

$$\square = \square - \square$$
$$\square = \square$$

6. $30 = m - 18$

$$\square + \square = \square$$
$$\square = \square$$

7. $150 = e + 42$

$$\square - \square = \square$$
$$\square = \square$$

8. $a - 51 = 12$

$$\square = \square + \square$$
$$\square = \square$$
