Treasure Found on the *SS Republic*

The wreck of the *SS Republic* was discovered in 2003 by a private company called Odyssey Marine Exploration. The ship was found ~~by the company~~ at the bottom of the ocean 100 miles southeast of Savannah, Georgia.

The remains of the *SS Republic* were around 1700 feet (518 meters) deep. New high-tech equipment was used by Odyssey to aid in the exploration and recovery effort. For example, items were removed from the wreck by a robotic craft called ZEUS.

Over 51,000 gold and silver coins were recovered by the Odyssey team from the wreck. Everyday items such as shoes, cups, and bottles were also found by the team. Photos of these artifacts are displayed on the company's website. Facts and details are also given by the company on the site for anyone who wants more information.

Mystery at Sea: The *Mary Celeste*

I have chosen to research the mystery of the ship *Mary Celeste*. This famous story should ^{be included} ~~include~~ on any list of historical mysteries. In early November 1872, the ship left New York carrying goods to Italy. One month later, the ship was discovered in the Atlantic Ocean by another ship. There was no one on board, but the goods that the *Mary Celeste* was carrying were still on the ship.

There was no sign of trouble, but the sailors, the captain, and his family could not found. The ship's lifeboat was missing, and a long rope was attached to the back of the ship. Some versions of the story say that a fully prepared meal could see on the table, so maybe everyone left in a hurry. This, however, cannot be confirmed. Even now we don't understand exactly what happened, and the truth may never know.

In my opinion, the evidence should be examined again by people. New information might discover using modern technology. Many people don't agree with me, though. They think some things just can't be explain.
