

## Zadanie 9. (0–4)

Przeczytaj tekst. Uzupełnij luki w zdaniach 9.1.–9.4. zgodnie z treścią tekstu. Luki należy uzupełnić w języku angielskim.

### JUPITER

Have you heard about the planet called Jupiter? You must have, because it's the largest planet in our Solar System. Actually, it's so large that you could fit all the other planets inside it!

Jupiter isn't as beautiful as Saturn (because Saturn has its awesome rings around) but it surely is more interesting. For example, a day on Jupiter lasts only 9 hours and 55 minutes. That's really short compared to our 24 hours!

Jupiter is the fifth planet from the Sun and is mostly made of gases. That's why it's called a "gas giant". There are three more gas giants in our Solar System – Saturn, Uranus and Neptune. Jupiter was discovered a long time ago – people found out about it around the 7th or 8th century. It was named after the king of the Roman gods.

One very interesting thing on Jupiter is the Great Red Spot. It's a huge storm that has been going on for over 400 years. That spot is three times bigger than our planet Earth and the winds inside it can reach 400 kilometres/hour. We don't exactly know what chemicals give the spot its colour.

You wouldn't be able to live on that planet. But still, it's interesting to watch it through the telescope.

- 9.1. A day on Jupiter is \_\_\_\_\_ a day on Earth.
- 9.2. There are \_\_\_\_\_ gas giants in our Solar System.
- 9.3. \_\_\_\_\_ on Jupiter's surface is known as the Great Red Spot.
- 9.4. The Great Red Spot is \_\_\_\_\_ three Earths.
