Name: _____ Form: _____

Dividing Fractions

Find each quotient by following the steps below.

1. Make each fraction an improper fraction (if needed)
   Or change any whole number to a fraction by putting it over 1.
2. Apply the KCF (Keep-Change-Flip)
   - Keep the first fraction.
   - Change the sign from ÷ to x.
   - Flip the second fraction (find the reciprocal).
3. Simplify the answer.

a. $\frac{1}{2} \div \frac{3}{8} = \frac{}{} \times \frac{}{}$ $= \frac{}{} \times \frac{}{} = \frac{}{} = \frac{}{}$
b. $\frac{8}{5} \div \frac{2}{3} = \frac{}{} \times \frac{}{}$ $= \frac{}{} \times \frac{}{} = \frac{}{} = \frac{}{}$
c. $\frac{12}{7} \div 4 = \frac{}{} \div \frac{}{}$ $= \frac{}{} \times \frac{}{} = \frac{}{} \times \frac{}{} = \frac{}{}$
d. $3\frac{1}{2} \div 7 = \frac{}{} \div \frac{}{}$ $= \frac{}{} \times \frac{}{} = \frac{}{} = \frac{}{}$
