

The table shows weather data collected over a three-day period.

Day	Temperature (°F)	Wind Speed (mph)	Wind Direction	Humidity
1	31	15	west	67%
2	34	6	north	98%
3	42	5	west	92%

Which of the following **best** explains why there was a greater chance of precipitation on day 2 than on day 1?

- ☐ A. Day 1 had stronger winds.
- ☐ B. Day 2 had higher humidity.
- ☐ C. Day 1 had colder temperatures.
- ☐ D. Day 2 had more wind from the north.
