2 Listen and mark (✓) the correct answer. 61

1. What does NASA do?

☐ only makes satellites ☐ makes satellites ☒ does a lot of different things

2. The new program will send humans to:

☐ Mars ☐ the moon and Mars ☐ the moon

3. Who work at NASA?

☐ only astronauts ☐ only scientists ☐ many different professionals

4. Where is NASA?

☐ in NASA City ☐ all over the USA ☐ in Washington D.C.

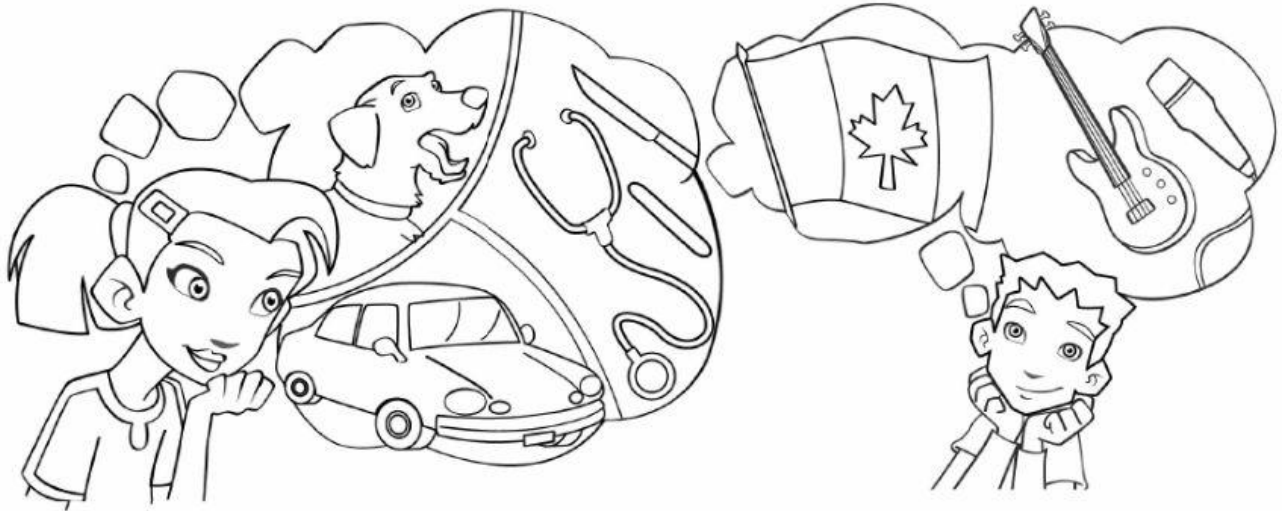

5. What is Orion?

☐ a new program ☐ a new satellite ☐ a new spacecraft

3 Read and write your opinion.

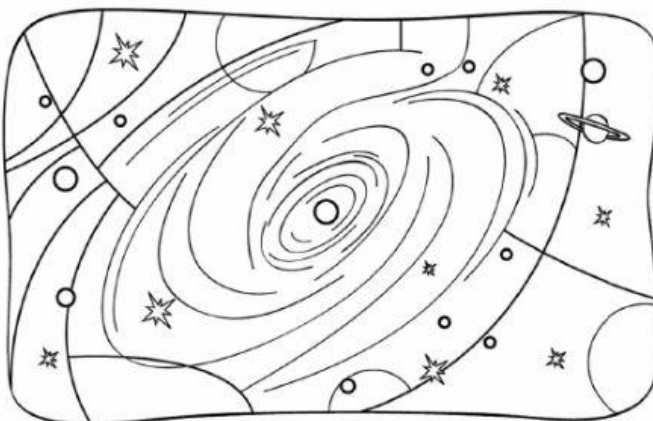

1. Extraterrestrials will come to Earth. _____
2. I don't think we will have extraterrestrials as pets.

4 Look and write about the children's future possibilities.

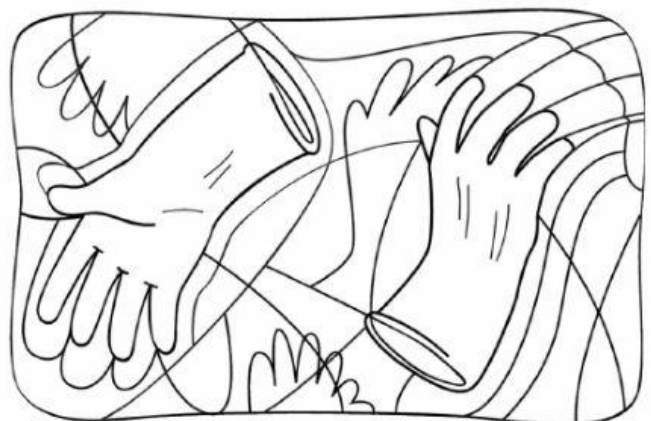

1. She might become a doctor. _____
2. _____
3. _____
4. _____
5. _____

5 Look and write about the pictures.

1. It might _____

2. They might _____

6 Read and fill in the blanks.

	Mars	Neptune	Uranus
Distance from the Sun	4th planet	8th planet	7th planet
Rotation time	24 hrs, 39 min, 35s	12 hours	17 hours
Time to orbit the Sun	1 year, 320 days	164.79 years	84 years
Satellites or moons	2 moons	13 moons	27 moons
Characteristics	Because of its red color, the Romans associated it with war.	2,400 km/h winds	A season lasts 42 years. Cold temperature: -224° C

1. Uranus has the longest seasons.
2. _____ has almost the same rotation time as the Earth.
3. The _____ thought about war when they saw Mars.
4. _____ has the shortest rotation time.
5. There are more than 20 moons around _____.
6. The temperature on Uranus is the _____.
7. Of the three, _____ is the closest to the Sun.
8. Neptune has fewer moons than _____.
9. Winter in _____ lasts for many years.
10. Because it rotates so fast, there are also strong _____ on Neptune.
11. _____ has the longest orbit time.

► Read the text. Then write about a different planet from the chart.

Neptune is the eighth planet from the Sun. Its rotation time is 12 hours. Its orbit time is 164.79 years. It has 13 moons. Wind travels as fast as 2,400 kilometres per hour.
