

MATHS YEAR 2

Add and regroup the ones.
Show your workings.

Example

$$778 + 119 = ?$$

First, add the ones.

$$8 \text{ ones} + 9 \text{ ones} = \underline{17} \text{ ones}$$

Regroup the ones.

$$17 \text{ ones} = \underline{1} \text{ ten } \underline{7} \text{ ones}$$

Then, add the tens.

$$1 \text{ ten} + 7 \text{ tens} + 1 \text{ ten}$$

$$= \underline{9} \text{ tens}$$

$$\begin{array}{r} 7 \overset{1}{7} 8 \\ + 1 1 9 \\ \hline 8 9 7 \end{array}$$

Lastly, add the hundreds.

$$7 \text{ hundreds} + 1 \text{ hundred} = \underline{8} \text{ hundreds}$$

$$\text{So, } 778 + 119 = \underline{897}.$$

Write $778 + 119$
in this way.
Then, add.

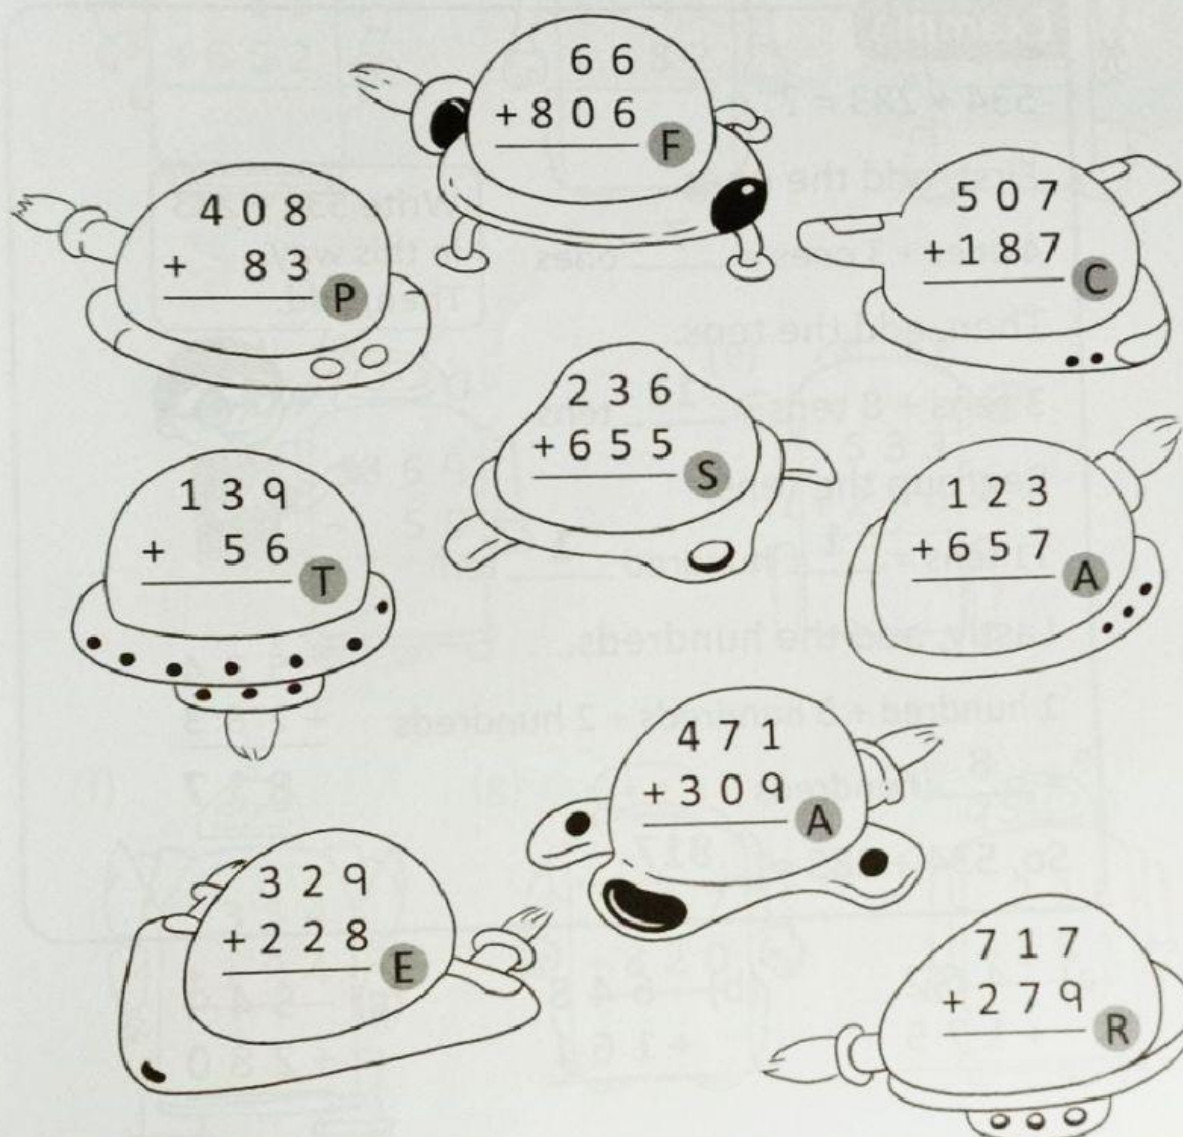

$$\begin{array}{r} \text{(a)} \quad 569 \\ + 122 \\ \hline \end{array}$$

$$\begin{array}{r} \text{(b)} \quad 637 \\ + 156 \\ \hline \end{array}$$

$$\begin{array}{r} \text{(c)} \quad 98 \\ + 68 \\ \hline \end{array}$$

3. Azwan bought a toy spaceship.
What kind of toy spaceship did he buy?
Add and find out by writing the letters that match
the answers.

891 491 780 694 557 996 780 872 195
