

Name : _____ No. _____ M. 4/ _____

Exercise No. 2

Read Corrine's email about an unusual house.

Hi Emma,

How are you? We're staying in a really unusual holiday home for two weeks. It's a tall, old white lighthouse in Somerset. It's 33 meters high with 120 stairs! There are eight floors with three bedrooms, a living room, a big modern kitchen and a bathroom. The bedrooms all have small new showers and the view of the sea are amazing. All the walls are round of course, but the rooms are bigger than you think. The top floor has big old light, but it doesn't work now. The lighthouse is 80 years old but everything is modern inside and there's even Wi-Fi. What do you think? Isn't it amazing?

**Love,
Corrine**

From the email.

What do these numbers mean?

1. 120 = _____

2. 8 = _____

3. 2 = _____

4. 80 = _____

5. 33 = _____
