A played B is going C goes

Reading

- D** Read the text. Five sentences are missing.
Match the sentences (A-F) to the gaps (1-5).
There is one extra sentence. ...

- 1 ... A As its name suggests the Dead Sea doesn't have much life.
- 2 ... B The high salt content also gives the water healing properties.
- 3 ... C But this is not its only claim to fame.
- 4 ... D Unfortunately, and in large part due to human activity, the Dead Sea has been shrinking.
- 5 ... E In fact, this is the only place in the world where you can lie down on the water and read a book.
- F It's not surprising then that as early as the first century BC it was a health resort.

A Very Deadly Place

Deep in a valley bordering Jordan to the east and Israel to the west is the Dead Sea, one of the most spectacular natural features in the world. With its surface and shores located at 423 m below sea level, it is the world's lowest land elevation. The Dead Sea is also one of the world's saltiest bodies of water and, with a maximum depth of 377 m, is the deepest landlocked salt lake in the world. Rainfall is scarce in the area and the amount of water that evaporates from the surface of the sea is greater than the amount that flows into it. This maintains the high salt content of the water and the rocks lining its shores are covered in shiny white salt crystals giving them a whitish snow-covered appearance.

This is due to the high concentration of salt in the water, which makes it a very hostile environment for fish and aquatic plants. People, however, have been coming to the Dead Sea for thousands of years. In ancient times, the lake and its shores supplied a variety of natural products including fertilisers, cosmetics and even balms for Egyptian mummification. Its water also contains up to 35 minerals such as magnesium, calcium and potassium that can be used for health and beauty purposes.

In fact, it was known **throughout** the Mediterranean and the **Middle East** for its healing properties.

Today, people still come to the Dead Sea in the hope of relieving pain caused by conditions such as arthritis and rheumatism or simply to relax and nourish their skin in its unique waters. And because the salt content is four times that of most of the world's oceans, you can float in the Dead Sea without even trying, which makes swimming here a truly relaxing experience.

The area has become both a tourist attraction and a major centre for health research and many pharmaceutical companies have been set up there. It also supplies neighbouring countries with a range of natural resources.

Scientists say that the water level is decreasing by almost a metre per year and if something isn't done, this natural treasure could be lost.

Everyday English

G

Choose the correct response. ...

- 1 A: How can I help you? ...
B: **a** We have a room on the first floor.
b I'd like to book a room, please.
