

Name _____

La Horquetta South Government Primary School

Monthly Test

1. Read carefully then click the correct statements only.

- A mixture consists of two or more substances mixed together which do not chemically combine.
- A mixture consists of two or more substances mixed together which chemically combine.
- The properties of mixtures are lost when mixed together.
- The properties of mixtures remain the same after mixing.
- Mixtures can be physically separated.
- Mixtures cannot be physically separated.

2. Match the following:

magnetism	Separating large particles that can be clearly seen by hand
filtration	Separating two dry substances with particles of different sizes
Sieving	Separating two solids, one of them has magnetic properties
hand picking	Separating a solid from a liquid using a porous material

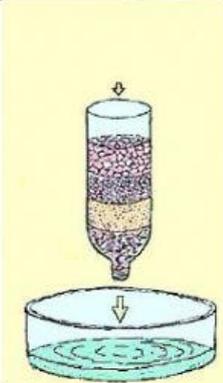

3. Which method of separation is the best to separate the individual parts of these mixtures in the following?

magnetism

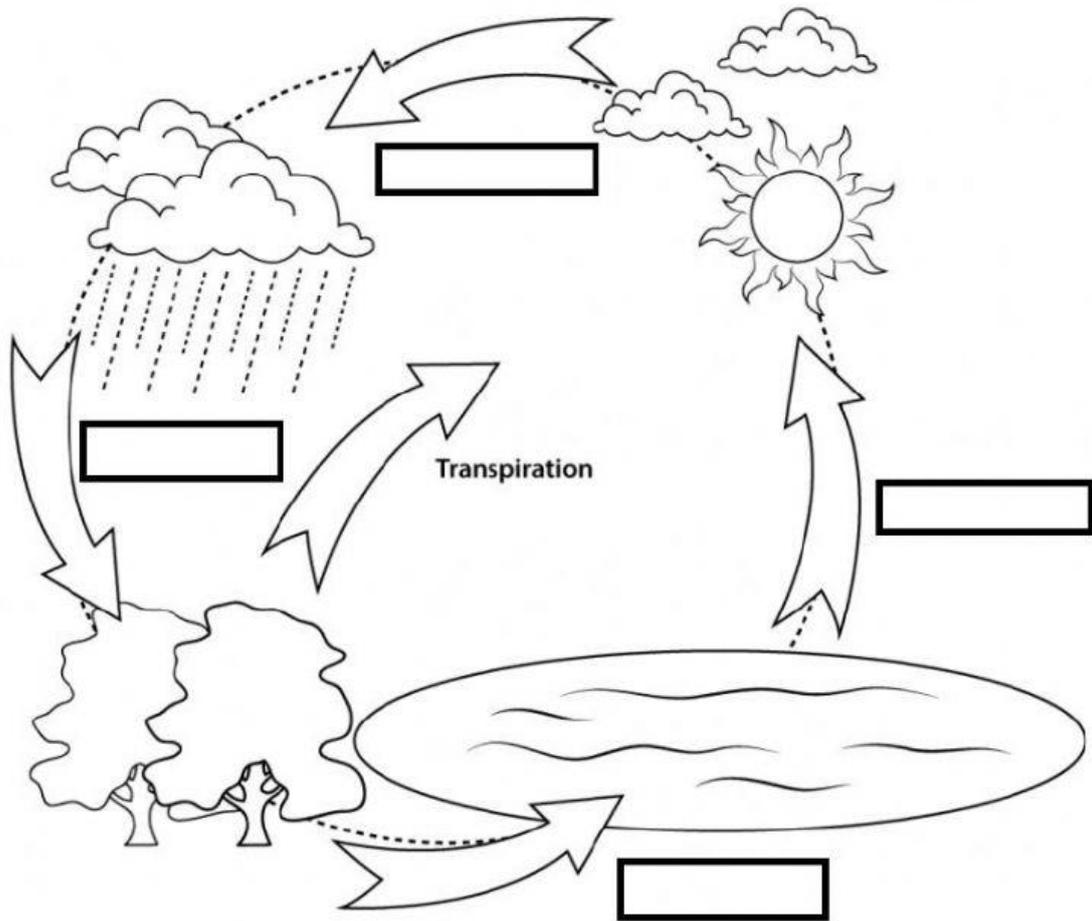

filtration

Sieving

hand picking

rice and flour			
salad			
soil in water			
paper clips in sand			

4. The diagram below represents _____.

Label the missing processes in the diagram above.
