

*To begin with rapist deserve the death.*

*Another example the law of talion has to be apply so that murderers' relatives could feel the same as the victims.*

*Regarding committing political corruption which affects the country's economy.*

*For example when the victim is a child who could suffer for a trauma.*

*another example, people who give favors to companies that are not beneficial for a region or town.*

*From my point of view death penalty has to be apply in Peru for rapist, murderers and corrupt people.*

*Another factor to consider is the death for murderers.*

*Last but not least, people who committed any act of corruption.*

*For instance, serial killers will never change.*

*All in all, death penalty is necessary to decrease the rape, killers and corruption.*

*In addition, when any women were kidnapped or drugged to be abused.*
