

Nervous System

Assalamualaikum... Can you help me to name the different parts in the nervous system?

Next, can you help me to fill in the blanks with the correct word?

The _____ is the main organ in the nervous system. It is protected by the _____. The _____ are spread all over our body connected to our sense organs. The nerves then send the messages that it gets from our _____ senses and send it to the _____ and then from there it goes to our brain. Our brain will decide what to do with the messages and send it to the correct parts of our body.
