How would you think the modern technology will change the workplace in the next 100 years?

Thanks to modern technology, there have been enormous changes in the workplace over the past 100 years.

So now, let us consider the changes that (0) **are likely to occur** in the next 100 years. Unfortunately, I believe that not all changes will be for the better. For example, more people are predicted to work from home and so they (1) _____ more isolated from their colleagues. On the other hand, they (2) _____ greater freedom to choose their working hours.

A further possible change is that handwriting is likely to become obsolete (*lỗi thời*). We are already so used to using a keyboard that today's children are losing the ability to spell without the aid of a word processor.

Without a doubt, even greater changes (3) _____ in technology used in the workplace. Computers (4) _____ to grow even more powerful and this will result in an even faster pace of life than we have now. Let us hope that our employers (5) _____ way to reduce the stress on worker's this fast pace can bring.

I also think these improvements in technology are likely to lead to even more globalization than now and companies will develop very strong international links.
