

Add the following unlike fractions
(Express your answers in simplified Improper Fractions):

$$1. \frac{5}{8} + \frac{5}{6} = \frac{\quad}{\quad} + \frac{\quad}{\quad} = \frac{\quad}{\quad} \quad 4. \frac{7}{8} + \frac{19}{24} = \frac{\quad}{\quad} + \frac{\quad}{\quad} = \frac{\quad}{\quad}$$

$$2. \frac{5}{6} + \frac{7}{9} = \frac{\quad}{\quad} + \frac{\quad}{\quad} = \frac{\quad}{\quad} \quad 5. \frac{13}{33} + \frac{10}{11} = \frac{\quad}{\quad} + \frac{\quad}{\quad} = \frac{\quad}{\quad}$$

$$3. \frac{4}{5} + \frac{3}{7} = \frac{\quad}{\quad} + \frac{\quad}{\quad} = \frac{\quad}{\quad}$$
