Grammar and reading.

Задание 2.

2a) Look at the photos. Which animal do you think wins when the two fight?

The great white shark

The killer whale

Read the text and check.

The great white shark and the killer whale are both great hunters, but which is stronger? Great white sharks are more dangerous to people, but are they better hunters? The answer is maybe no. Killer whales are bigger and faster than great white sharks. They're much more intelligent, and they're stronger and heavier too. In fact, killer whales sometimes kill and eat great white sharks.

- The comparative form of short adjectives ends in *-er*; the superlative form ends in *-est*.

small – smaller – the smallest

big – bigger – the biggest

rare – rarer – the rarest

Задание 3.

3a) Complete the sentences below with the comparative or superlative form of the adjectives in brackets.

1. Sharks are _____ (dangerous) than crocodiles. _____
2. Crocodiles are _____ (slow) than most humans on land. _____
3. Tigers are the _____ (heavy) of the big cats. _____
4. Giraffes are the _____ (tall) land animals. _____
5. Dolphins are _____ (intelligent) than gorillas. _____
6. Baby gorillas are _____ (big) than human babies. _____

3b) Read the text and decide which sentences are true or false.

Crocodiles are amazing animals. But they're dangerous – very dangerous. People think sharks are dangerous animals, but they aren't really - they only kill about five people a year in the whole world. But crocodiles kill hundreds! They attack people in the water, of course. But they also attack people on land. They can run very fast - about 17 kilometers an hour. That's faster than a lot of people can run!

Tigers are beautiful animals. And they're big, too - bigger and heavier than all the other big cats, like lions and jaguars, an adult male tiger can weigh 300 kilograms. That's about the same as you, your brother, your mum and your dad, all put together!

Giraffes are the tallest animals in the world. Adult giraffes are about five meters tall. That's perfect for eating the leaves of trees. Of course, it's more difficult to drink water from a lake or river.

Gorillas are very intelligent animals. Some gorillas can understand a thousand different words! So they're much more intelligent than dolphins, for example. As you can see, gorillas are taller and heavier than humans. However, when they are born, they're smaller than humans - they only weigh about two kilos. Human babies usually weigh about three and a half kilos or more.

3c) Answer the questions.

1. How many people do sharks kill every day?
2. How fast is crocodile?
3. How heavy is an adult male tiger?
4. How tall is adult giraffe?
5. How many words can some gorillas understand?
6. How heavy is a baby gorilla?

Grammar.
