

PROYECTO DISCIPLINAR

NAME.

LEVEL: 3RD

PROYECTO No. 07 SUBNIVEL/NIVEL: / CURSO: 3 ros BGU CICLO SIERRA - AMAZONIA AÑO LECTIVO: 2021
– 2022

Objetivo de aprendizaje:

Students will understand cultural aspects of their own and protect environment through topics in context in order to value and protect their cultural aspects and environment.

Indicadores de evaluación:

EFL 5.2.3. Follow main ideas in topics covered in other curricular subjects with the help of visual support, using concepts and vocabulary that have been studied in advance.

I.EFL.5.6.1. Learners can deal with practical, everyday communication demands in familiar social and academic contexts, such as following directions in class activities and identifying main ideas in other curricular subjects when given sufficient support. (I.1, I.3, S.1)

Proyecto TÍTULO:

The world needs me

Inglés

Objetivo semanal: Identify the importance to protect the environment and use the relative clauses.

Actividades para la semana # 1

TOPIC: PROTECTING THE ECUADORIAN AMAZON

You know:

The Amazon region is very important to preserve lives in our world.

Remember:

You need to keep in your mind these tips:

- 1.- You need to know the biodiversity and indigenous groups in Amazon region are very important.
- 2.- You have to know the indigenous people speak different languages and have different customs.

Related to the values:

Keep this reflection: All people can do something to preserve our biodiversity and indigenous groups.

1. Read the text "Protecting the Ecuadorian Amazon" and answer the questions.

Protecting the Ecuadorian Amazon

The Amazon region of Ecuador is found in the eastern part of the country. Of the four geographical regions of the country (Amazon, Highlands, Coast, and Galapagos), it is the largest in area. It is one of the most biodiverse places on the planet, with thousands of species of plants and animals. It is a natural treasure for the country and the world. There are five national parks in this region: Yasuni, CayambeCoca, Llanganates, Sumaco Napo-Galeras, and Río Negro-Sopladora. This beautiful region is in danger. There is a lot of oil (near 800 million barrels) in the ground of the Ecuadorian Amazon. If oil companies remove this oil from the ground, the ecosystem will be disturbed. It can harm the plants and animals. Some indigenous groups of the region, especially the Waorani, have fought and won important legal battles to preserve the land. But this fight is far from finished. There are constant attempts by oil companies to drill in the region. There are also instances of illegal deforestation in the region. As long as there continues to be strong opposition to this, there is hope that the Amazon region of Ecuador will remain protected.

- According to the reading, what is special about the Amazon region?

- What are the two sides of the oil debate? What do oil companies want? What do the indigenous people want?

- Have you heard any news recently about this topic? Share it.

- What is your own personal opinion? Should the oil companies be able to drill for oil in order to make money, or should the Amazon be protected? Defend your opinion with solid arguments.
