Beliefs about Organs Donation

Many people believe that when ___ organ transplant takes place, parts of ___ donor's personality travels with ___ organ. This is according to new research into people's opinions of organ donation. Professor Bruce Hood works ___ UK's Bristol University and told ___ conference that most people are strongly against receiving ___ organ from ___ killer. His test volunteers said they'd be very happy to receive ___ organ from a "good" person. Professor Hood said some of his patients believed they now had ___ part of the personality of their organ donors. He said this even included things like ___ memories and experiences of ___ donor.
