

**Science****Select the correct word to fill in the blanks.****Life Cycle of a Butterfly**

<b>leaf</b>	<b>larva</b>	<b>metamorphosis</b>	<b>chrysalis</b>
-------------	--------------	----------------------	------------------

Butterflies begin life as tiny eggs. The eggs hatch into caterpillars or

\_\_\_\_\_ . The caterpillars stop moving and fastens itself to a

\_\_\_\_\_ and spins a cocoon around itself. The caterpillar has now

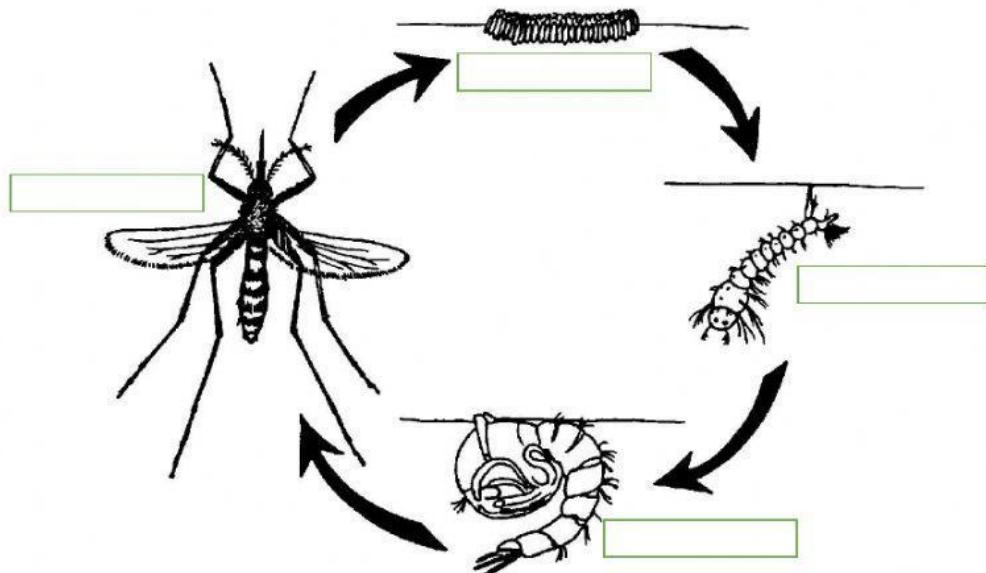

changed into a pupa or \_\_\_\_\_. Inside the pupa the caterpillar

changes into a butterfly. This process of change is known as

\_\_\_\_\_.

**Select the correct answer to fill in the blanks.****Life Cycle of the Mosquito**

<b>Pupa</b>	<b>Adult Mosquito</b>	<b>Larva</b>	<b>Eggs</b>
-------------	-----------------------	--------------	-------------

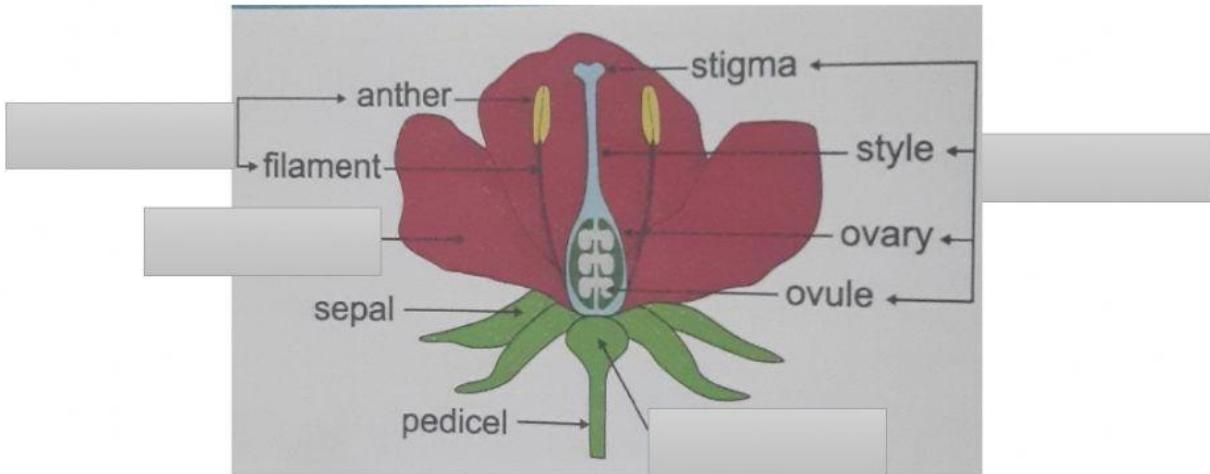

The larva is also called \_\_\_\_\_ because they wriggle a lot.

The adult mosquito lays eggs one at a time, but soon the eggs join together to form a  
\_\_\_\_\_.Wrigglers breath through a \_\_\_\_\_. The mosquito spend three stages of its  
life in \_\_\_\_\_.

## Parts of the Flower

Select the correct answer to fill in the blanks.

pistil (female)	Stamen(male)	receptacle	petal
-----------------	--------------	------------	-------

Select the part of the flower that performs each function.

Part	Function
