

### Example 2

### SUBTRACT

- 1  $(4x - 5) - (-4x + 4)$
- 2  $(x + 5) - (-6x - 4)$
- 3  $(7x + 15) - (-9x - 14)$
- 4  $(6x - 7) - (-2x + 4)$
- 5  $(2x + 15) - (-5x - 5)$
- 6  $(7x + 3y) - (-8x - 6y)$

### Outcomes

- To add linear expressions.
- To solve real world problems involving subtracting expressions
