

Nama:

Sel berdasarkan keberadaan membrane inti di dibagi menjadi 2 kelompok, yaitu sel prokariotik (belum memiliki membrane inti) dan sel eukariotik (sudah memiliki membrane inti)

| Kelompokkanlah gambar berikut kedalam sel berdasarkan keberadaan membrane inti! |             |            |
|---------------------------------------------------------------------------------|-------------|------------|
| Nomor                                                                           | Prokariotik | Eukariotik |
| 1.                                                                              |             |            |
| 2.                                                                              |             |            |
| 3.                                                                              |             |            |

Sel hewan

Sel jamur

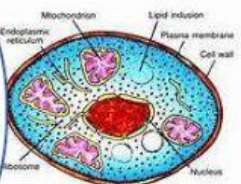

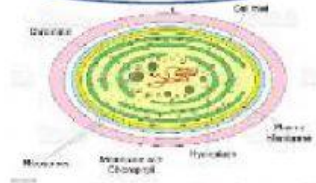

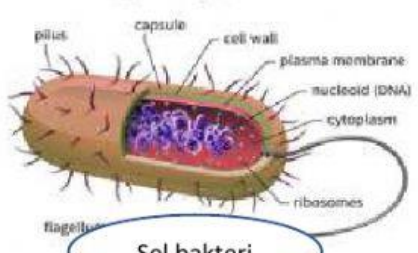

Fig. 1.8. Fungi: Fine structure of *Sarcoma* yeast cell based on an electron micrograph.

Sel cyanobacteri

Sel alga hijau biru

Sel tumbuhan

Sel bakteri
