

Ways to conserve water Indoors and Outdoors

Drought is a big problem that needs to be taken seriously. We use a lot of water everyday like brushing our teeth or taking showers. We must not waste water. We must learn to save water by using water carefully.

Look at the pictures below and state some ways you can do to save/conserve water. You may use the statements in the table below.

Repair dripping taps and pipes.

Turn off taps while brushing your teeth.

Use a basin to wash your shoes.

Take shorter showers.

Use a bucket not a hose to wash the car.

Water gardens only when needed using a watering can.

Use washing machine when you have a full load of clothes.
