Hallar el ángulo que falta.

①

Suma de ángulos

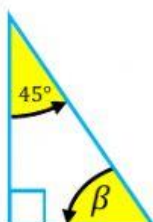

$$\alpha + \beta + 90^\circ = 180^\circ$$

$$\beta = 180^\circ - 90^\circ - \alpha$$

$$\beta = 180^\circ - 90^\circ - \quad^\circ$$

$$\beta = \quad^\circ$$

②

Suma de ángulos

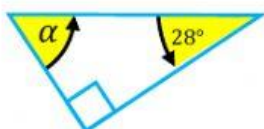

$$\alpha + \beta + 90^\circ = 180^\circ$$

$$\beta = 180^\circ - 90^\circ - \alpha$$

$$\beta = 180^\circ - 90^\circ - \quad^\circ$$

$$\beta = \quad^\circ$$

③

Suma de ángulos

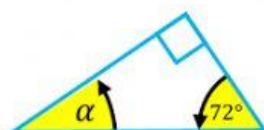

$$\alpha + \beta + 90^\circ = 180^\circ$$

$$\alpha = 180^\circ - 90^\circ - \beta$$

$$\alpha = 180^\circ - 90^\circ - \quad^\circ$$

$$\alpha = \quad^\circ$$

④

Suma de ángulos

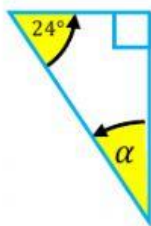

$$\alpha + \beta + 90^\circ = 180^\circ$$

$$\alpha = 180^\circ - 90^\circ - \beta$$

$$\alpha = 180^\circ - 90^\circ - \quad^\circ$$

$$\alpha = \quad^\circ$$

5

**Suma de ángulos**

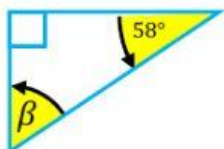

$$\alpha + \beta + 90^\circ = 180^\circ$$

$$\beta = 180^\circ - 90^\circ - \alpha$$

$$\beta = 180^\circ - 90^\circ - \quad \circ$$

$$\beta = \quad \circ$$

6

**Suma de ángulos**

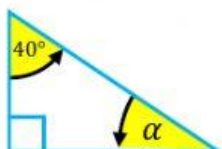

$$\alpha + \beta + 90^\circ = 180^\circ$$

$$\beta = 180^\circ - 90^\circ - \alpha$$

$$\beta = 180^\circ - 90^\circ - \quad \circ$$

$$\beta = \quad \circ$$

7

**Suma de ángulos**

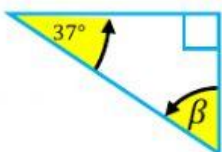

$$\alpha + \beta + 90^\circ = 180^\circ$$

$$\alpha = 180^\circ - 90^\circ - \beta$$

$$\alpha = 180^\circ - 90^\circ - \quad \circ$$

$$\alpha = \quad \circ$$

8

**Suma de ángulos**

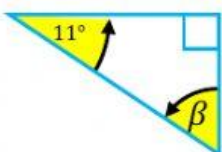

$$\alpha + \beta + 90^\circ = 180^\circ$$

$$\beta = 180^\circ - 90^\circ - \alpha$$

$$\beta = 180^\circ - 90^\circ - \quad \circ$$

$$\beta = \quad \circ$$

9

**Suma de ángulos**

$$\alpha + \beta + 90^\circ = 180^\circ$$

$$\beta = 180^\circ - 90^\circ - \alpha$$

$$\beta = 180^\circ - 90^\circ - \quad \circ$$

$$\beta = \quad \circ$$
