Snow adventures

We're in Tromsø, Norway and we're **getting ready** to go dog sledding. There's thick snow on the ground and it's –4°C. The dogs are running round. They want to start their work for today. First, the guide gives us special boots, gloves and thick jackets. Then, he **explains** how to drive the sled – a vehicle pulled by animals that is used for carrying people or things over snow. Finally, we get onto the sled, hold the **reins** and the dogs start running. There are usually between eight and twelve dogs for each sled, and together they can run very fast! It's scary, but also very exciting! After two hours of sledding, we stop at a Sami tent and sit by the fire. We drink hot tea and have a traditional Sami snack.

It's starting to get dark and we go back outside. There are strange colours in the night sky – green, orange and pink lights. We're looking at the Northern Lights. Solar wind comes from the sun and as it moves through Earth's atmosphere, it makes these amazing colours. It's fantastic!
