Label the diagram: PRECIPITATION COLLECTION EVAPORATION CONDENSATION

Write the correct process of the cycle of water:

1. When the water vapour rises, it cools and condenses to form clouds.

LIVEWORKSHEETS

2. Some of the water in oceans, rivers and lakes changes from a liquid to a gas.
3. When the water falls into the ground, it collects in rivers and lakes.
4. The water droplets in clouds become heavy and fall to the ground.
