Let's Take a Trip To

Geography

There are two big rivers in China. The Huang He river and the Yangtze river. The Yangtze river has a dam called the Three Gorges Dam. The dam is the largest hydroelectric power source in the world.

Best time to visit China is spring & fall.

China is the third largest country in the world by area.

Earthquake Detector

• world's first seismograph an instrument to detect earthquakes was invented by Zhang Heng.

• Inside the Chinese seismograph there was a pendulum that swings when there is an earthquake. The seismograph which knocks the balls out of the dragons' mouths and into the roads makes sound and alarm the people.

• Zhang's seismoscope was a giant bronze vessel.

Compass

During Han dynasty, the ancient Chinese compass was made from iron oxide, a mineral ore. Iron oxide is also known as lodestone and magnetite. The lodestone was carved into the shape of a spoon.

• Compass was invented to help people find their way while traveling.

• It was developed for aligning buildings with directions.

• It is also used as a tool in fortune telling.
