POLARITY OF MOLECULES AND MOLECULAR GEOMETRY

Determine the type of bond between the following atoms by computing their Electronegativity Difference. Then identify which molecule is polar and which is nonpolar based on their Lewis Dot structure and molecular shape.

Molecule	Δ EN	Bond Polarity	Molecular Geometry	Polarity of Molecule
1. PCl_5				
2. $BeCl_2$				
3. CH_4				
4. OF_2				
5. SF_6
