

FRACCIONS

Contesta:

Com se sumen les fraccions d'igual denominador?

Resol:

Suma o resta i simplifica, si cal, aquestes fraccions:

a) $\frac{10}{4} + \frac{12}{4} = \text{---} = \text{---}$

f) $\frac{10}{3} - \frac{3}{3} = \text{---} = \text{---}$

b) $\frac{12}{14} + \frac{22}{14} = \text{---} = \text{---}$

g) $\frac{12}{8} - \frac{3}{8} = \text{---} = \text{---}$

c) $\frac{6}{18} + \frac{3}{18} = \text{---} = \text{---}$

h) $\frac{15}{4} - \frac{4}{4} = \text{---} = \text{---}$

d) $\frac{6}{4} + \frac{4}{4} = \text{---} = \text{---}$

i) $\frac{25}{30} - \frac{5}{30} = \text{---} = \text{---}$

e) $\frac{6}{7} + \frac{19}{7} = \text{---} = \text{---}$

j) $\frac{16}{20} - \frac{2}{20} = \text{---} = \text{---}$
