

STARTER  **CPR for an infant**

In the table below, circle which is the correct way to hold your hands when giving chest compressions to an infant.

Activity 20

Similarities and differences

Each of the statements below describes CPR for infants. Beside each statement, tick if it is the same as the instructions for adult CPR, or if it is different.

	Same	Different
Place two fingers on the chest.		
Compress the chest by 4 cm.		
Do thirty compressions followed by two breaths.		
Perform compressions at a rate of 100-120 per minute.		
Do not stop CPR for more than ten seconds.		
Use a barrier device such as a pocket mask to give breaths.
