

Add and Subtract Fractions with like denominator

$$1) \quad \frac{2}{5} + \frac{1}{5} = \frac{\quad}{5}$$

$$2) \quad \frac{3}{6} - \frac{2}{6} = \frac{\quad}{6}$$

$$3) \quad \frac{2}{7} + \frac{4}{7} = \frac{\quad}{7}$$

$$4) \quad \frac{1}{8} + \frac{2}{8} = \frac{\quad}{8}$$

$$5) \quad \frac{3}{5} - \frac{1}{5} = \frac{\quad}{5}$$

$$6) \quad \frac{5}{10} - \frac{4}{10} = \frac{\quad}{10}$$

$$7) \quad \frac{2}{9} + \frac{3}{9} =$$

$$8) \quad \frac{6}{11} - \frac{3}{11} =$$

$$9) \quad \frac{9}{20} - \frac{2}{20} =$$

$$10) \quad \frac{1}{7} + \frac{4}{7} =$$

$$11) \quad \frac{8}{20} + \frac{3}{20} =$$

$$12) \quad \frac{8}{12} - \frac{3}{12} =$$

Extra 4 Experts

Add or subtract these fractions, then change them to a mixed fraction

$$\frac{3}{6} + \frac{4}{6} =$$

$$\frac{2}{3} + \frac{2}{3} =$$

$$\frac{10}{4} - \frac{3}{4} =$$

$$\frac{5}{3} - \frac{1}{3} =$$
