

Name: _____

Grade 1- _____

Science Week 3-Quarter 3
Pushing and Pulling Can Move Objects

Look at the children in the picture. What are they doing? What causes the ball to move? What causes the cart and the box to move?

Objects move when you push or pull them. When you **push** or **pull** anything, you are applying force.

A **force** is a **push** or a **pull**. A force can move an object. A force can cause motion.

Keep in mind

Pull means to hold something and move it towards you.

Push means to hold something and move it away from you.

Tell what moves each objects. Write Push, Pull, or Push and Pull.
