IX. Read the passage carefully and write True or False.

There are some useful tips on saving energy at school. First, you should turn off lights, and other electrical appliances like computers and fans when you leave the classroom. Second, setting the air conditioner between 24°C and 28°C can help you save electricity. Third, remember to close the doors and the windows when you turn on the air conditioner in your classroom. This is because the air conditioner will need more energy to cool the room with open doors or windows. Finally, you could reuse or recycle plastic bags, plastic bottles and cans. This will help to save energy. Doing these things can help you save energy at your school.

46. There is only one tip to save energy at school. _____

47. We should turn off lights when leaving the classroom. _____

48. We should set the air conditioner below 24°C. _____

49. Air conditioners use less energy to cool rooms with open doors. _____

50. We could reuse plastic bags and bottles to save energy. _____
