

## 8B – U9 – BÀI TẬP THEO UNIT

### Bài 5: Chọn đáp án đúng.

How can scientists predict earthquakes? Earthquakes are not scattered anywhere but happen in certain areas. They happen in places where pieces of the earth's surface meet. For example, earthquakes often occur on the west-coast of North and South America, around the Mediterranean Sea, and along the Pacific coast of Asia.

Another way to predict earthquakes is to look for changes in the earth's surface, like a sudden drop of water level in the ground. Some people say animals can predict earthquakes. Before earthquakes people have seen chickens sitting in trees, fish jumping out of the water, snake leaving their holes and other animals acting strangely. After an earthquake happens, people can die from lack of food, water and medical supplies. The amount of destruction caused by an earthquake depend on types of building, soil conditions and population. Of the 6000 earthquakes on the earth each year, only about fifteen cause great damage and many deaths.

1. Earthquakes happen in certain areas where\_\_\_\_\_.

- |                                       |                                   |
|---------------------------------------|-----------------------------------|
| A. the population is large            | C. the soil conditions are stable |
| B. pieces of the earth's surface meet | D. many buildings are built       |

2. Earthquakes often happen along \_\_\_\_\_.

- |                                    |                              |
|------------------------------------|------------------------------|
| A. the east-coast of North America | C. the Pacific coast of Asia |
| B. the east-coast of South America | D. the coast of Australia    |

3. Looking for\_\_\_\_\_can help predict earthquakes.

- |                                      |                   |
|--------------------------------------|-------------------|
| A. changes in the earth's surface    | C. drops of water |
| B. water beneath the earth's surface | D. water currents |

4. After an earthquake, as a result of \_\_\_\_\_ people may die.

- |                       |                        |
|-----------------------|------------------------|
| A. lack of food       | C. lack of information |
| B. lack of friendship | D. lack of knowledge   |

5. The passage mainly discusses \_\_\_\_\_.

- |                               |                               |
|-------------------------------|-------------------------------|
| A. the damage caused by       | C. strange animal behaviors   |
| B. how strong earthquakes are | D. how to predict earthquakes |
