

What kind of weather is the most dangerous? Put the most dangerous at the top

1. Landslide
2. Drought
3. Dust storm
4. Wildfires
5. Hurricane
6. Blizzard
7. Heat wave
8. Flood
9. Volcanic ash

*I think a...
_____ is more dangerous than a _____.*

1. revolutionize
2. National Oceanic and Atmospheric Administration
3. Geostationary Operational Environmental Satellite (GOES-R)
4. Without a doubt
5. forecasting
6. HD televisions.
7. powerful
8. safer place
9. Airline pilots
10. zoom in
11. warn

Be clear!

Listen to the news, tick if the ideas are true or false

1. Scientists say the satellite will cause a revolution in space. **T / F**
2. The satellite cost a billion dollars. **T / F**
3. The satellite can take photos ten times faster than other satellites. **T / F**
4. The pictures from the satellite are like those from black and white TVs. **T / F**
5. The satellite will give us real-time photos of the weather. **T / F**
6. The satellite will help airplanes to avoid turbulence. **T / F**
7. We will not have to rely on weather information that is 15 minutes old. **T / F**
8. Weather forecasters will wait patiently to use the satellite. **T / F**

faster quality advanced billion today's other predict doubt

The USA has put into space the world's most (1) _____ and powerful weather satellite. Scientists say it will revolutionize how we (2) _____ the weather and how we look at weather events. The National Oceanic and Atmospheric Administration (NOAA) said its \$1 (3) _____ Geostationary Operational Environmental Satellite (GOES-R) will take weather photographs five times (4) _____ than (5) _____ satellites, and with four times higher image quality. The NOAA said: "Without a (6) _____, GOES-R will revolutionize weather forecasting as we know it." A weather forecaster said the difference in the speed and (7) _____ of the satellite's images is like the difference between old black and white TV pictures and (8) _____ HD televisions.

turbulence flooding real ago safer accurate rather property

The new satellite will give us powerful, (9) _____-time images and information. These will make the world a (10) _____ place. Airline pilots will receive better data to stay away from (11) _____. The satellite will be able to zoom in on severe weather events to get much more detailed and (12) _____ pictures. This will help emergency services to warn people more quickly and reduce the costs to human life and (13) _____. People will have better information about hurricanes, tornadoes, (14) _____, volcanic ash clouds, and wildfires. A scientist at the NOAA said: "It will give the weather as it's looking now (15) _____ than the weather that happened 15 to 30 minutes (16) _____." The NOAA said weather forecasters couldn't wait to use it.
