

FINDING MISSING LENGTHS USING PERIMETER

REMEMBER

1. To find the length of the side of a square – $\text{Perimeter} \div 4$.
2. To find the missing length in a rectangle when we have the perimeter and width or length –
 - Step 1 Multiply the width or length $\times 2$.
 - Step 2 Subtract the total from the perimeter.
 - Step 3 Divide the answer by 2.

Now do these.

1.

Calculate the length of 1 side of the square.

2.

The width is 5cm. Find the length.

3.

The length is 16cm. What is the width?

4.

What is the length of 1 side?

5.

The width is 9m. Find the length.

6.

How long is the side in this square?
