

2. Classify the words based on if they are made of matter or not

| Made of matter | Not made of matter |
|----------------|--------------------|
|                |                    |
|                |                    |
|                |                    |
|                |                    |

|           |              |         |
|-----------|--------------|---------|
| A Balloon | A loud noise | Clouds  |
| Rain      | Sunlight     | The Sun |

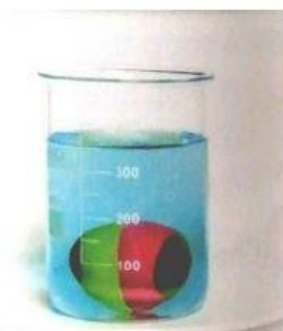

3. Match the objects to mass or volume.

a

|        |
|--------|
| MASS   |
| VOLUME |

b

4. Choose true or false:

|                                                                     | True | False |
|---------------------------------------------------------------------|------|-------|
| A kilogram of gold has the same <b>volume</b> as a kilogram of salt |      |       |
| A kilogram of gold has the same <b>mass</b> as a kilogram of salt   |      |       |
| A litre of water has the same <b>volume</b> as a litre of oil       |      |       |
| A litre of water has the same <b>mass</b> as a litre of oil         |      |       |
