

An Amazing Safari

A Listen and read.

Kruger National Park is in South Africa. It is a huge, famous park. Many people travel there to see animals. They go on a safari. They ride in a safari truck. This keeps them safe from the wild animals.

Kruger National Park has cheetahs. Cheetahs are fast. They are the fastest animal on land. They eat other animals. They have to move more quickly than other animals to catch them.

There are also buffaloes in the park. Buffaloes are heavy animals. They are heavier than most other animals. They can be dangerous, too. They might attack people when they get angry.

The elephants in the park are very big. Because of their size, they move more noisily than smaller animals. You can even hear them from a distance. Visitors can wait in their truck to see the elephants when they hear them coming.

At Kruger National Park, you can see a lot of interesting things. You can see what the animals look like and how they move. Would you like to go on a safari?

B Read and write.

1. Kruger National Park is in _____.
2. Cheetahs move _____ than other animals.
3. Buffaloes are _____ than most other animals.
4. Elephants move _____ than smaller animals.

A Read the story. Look at the words below. Then write.

Hi, I'm Chad. My family loves animals. We each have a favorite animal. My favorite animals are monkeys. They are cute. They are also very hairy. They have hair everywhere on their bodies. They are ① hairier than people. This helps them hide. My mother likes ② . They are orange and white with black stripes. They can move ③ . They don't make any sound. This way they can catch other animals to eat. Tigers are ④ but scary animals. My father likes ⑤ . They are very tall animals. They eat leaves off of tall trees. Giraffes can move ⑥ . This keeps them safe from lions. Animals are really interesting.

giraffes

silently

tigers

hairier

quickly
