Year 5 - Control Blocks

Fill in the blanks with the correct answer.

Control blocks are the blocks that control _____.

- 

(sprites only) — This hat block is triggered whenever a clone is created, and will only be run by that clone.

Scratch 3.0 has the following three Control Stack blocks:

- 

Pauses the script for the amount of _____
- 

— Pauses the script until the condition is true.
- 

Creates the specified _____

Scratch 3.0 has the following five Control C blocks:

- 

A _____ that repeats the specified amount of times.
- 

— A loop that will never end unless the Stop Sign is pressed or the script is stopped.
- 

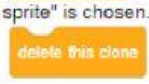

— Checks the condition so that if the condition is true, the blocks inside it will activate.
- 

└— Checks the condition so that if the condition is true, the blocks inside the first C will activate and if the condition is false, the blocks inside the second C will activate.
- 

A loop that will stop once the _____ is true.

Scratch 3.0 has the following two Control Cap blocks:

- 

— Stops the scripts chosen through the drop-down menu. Can also be a stack block when "other scripts in this sprite" is chosen.
- 

(sprites only) — Deletes a clone.
