

## Reading

### Sequencing II

1

Number the stages of a tadpole becoming a frog.

2

\_\_\_\_\_ The front legs pop out. The lungs are ready to use for breathing.

3

\_\_\_\_\_ The cells in the egg multiply and grow.

4

\_\_\_\_\_ The tadpole has become a frog.

5

\_\_\_\_\_ Back legs slowly form.

6

\_\_\_\_\_ Soon the cells grow into a swimming tadpole.

7

\_\_\_\_\_ Front legs develop inside the tadpole.

8

\_\_\_\_\_ The tadpole's tail seems to disappear.

\_\_\_\_\_ A mother frog lays her eggs in water.
