

Name: _____ , Class: Flyers _____ , Date: _____

"An invention begins as an idea. Then other people find ways to make that invention better. Our machines are always changing. Not very long ago, we thought of robots as science fiction, but robots are already part of our lives.

Robots are machines that can do the actions of a human. At first, most robots did boring or dangerous work in factories, like putting parts of cars together or putting chocolate bars in boxes read to go to the shops.

They could repeat the same action all day and never get bored. Those robots didn't need a human to control every action. Other robots need human control. For example, doctors use robots to help them operate on very small body parts. We use robots to test planes and cars. We also have robots which can clean our homes. Some robots drive special cars which don't need a driver and there are even robots on Mars!

Scientists have developed robots that look and behave like humans. They can talk to people, and scientists think they can help in hospitals and schools one day. Do you think it's possible that your future teachers will be robots?"

1/74 - Match the robots with the work they do

a Robots can help in the house. This robot travels over the floor and cleans it.

b There are robots on Mars. They send information back to Earth.

c These robots are making cars. Each robot has a series of actions they must do.

d Robots can help doctors operate on very small parts of the human body.

2/74 - Write a description of the robot which you invented. What does it do? How does it work? (Draw a picture in your notebook)

3/75 - Complete the descriptions of South Korean inventions with the words in the box.

everything

money

travel

screen

floor

keep

music

1 This helps you

clean the

and

it works with water.

2 You can do

you want to do by

touching the

3 If you use this when

you

you don't need

4 You can

all your

here.

4/75 - Read about the kimchi fridge and answer the questions.

no milk, no cheese and no yoghurts. This fridge is only for one food - kimchi, one of the most popular foods in Korea. It's a cabbage dish which is difficult to make and very difficult to keep in good

When you open this fridge, you won't find any of the foods you usually see in fridges. There's

condition. Koreans eat kimchi with many different meals and with the invention of the kimchi fridge, they can enjoy it all year. A lot of Koreans say that the kimchi fridge is the most important thing in their kitchen.

1. How is this fridge unusual?

.....

2. Why is it important in Korea?

.....

3. What do you think is the most important thing in your kitchen? Why?

.....
