Full name:
Class:

4 Near the Beach

Many fish and other little animals live in the water near the beach. There's lots of food for them there.

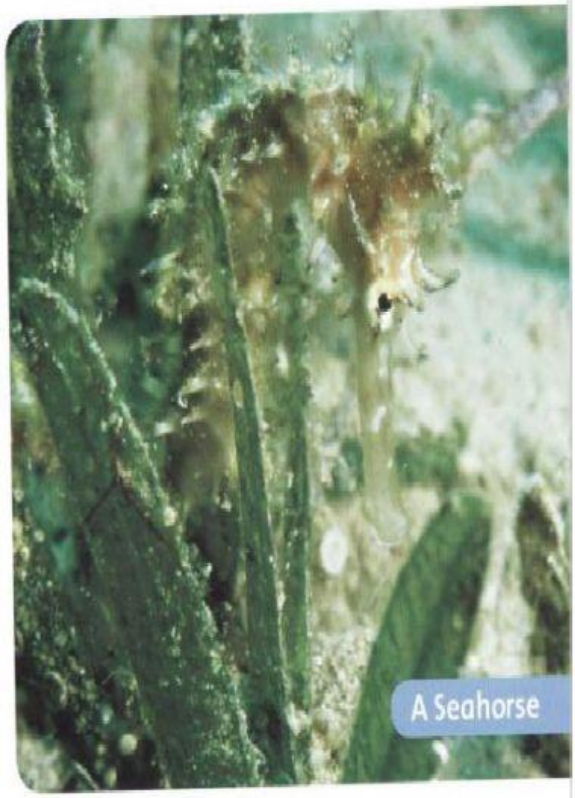

The prawn eats seaweed and little animals.

Discover!

The prawn has 20 legs. It walks with 10 legs, and it swims with 10 legs!

The seahorse eats very little fish. It eats very, very little animals and plants called plankton, too.

A Seahorse

See how this seahorse hides in the seaweed. In this green seaweed, the seahorse is green, but in yellow seaweed, it's yellow!
