

SOLID GEOMETRY III**8.1b Volume of right prism****Learning Outcome :**

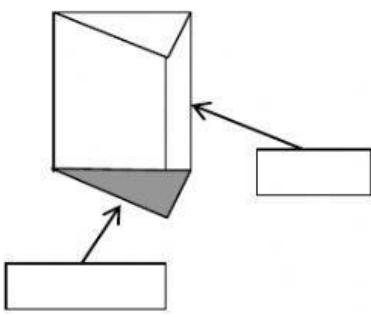

To calculate the volume of right prism in cubic units given the height and

- a) the base area
- b) dimensions of the base

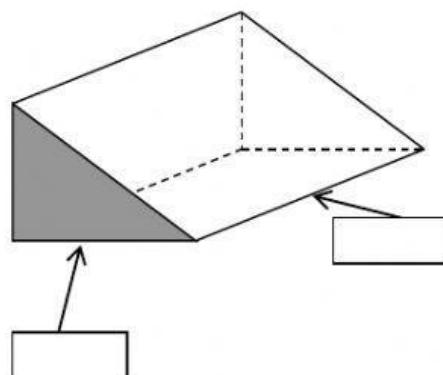

PRACTICE I

Identify the base and the height of the right prisms given below.

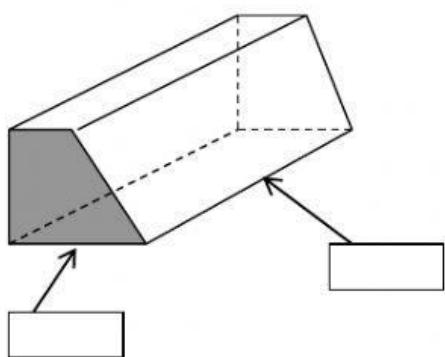

a)

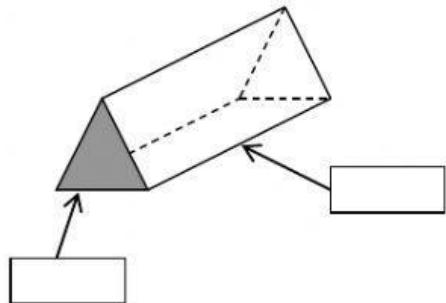

b)

c)

d)

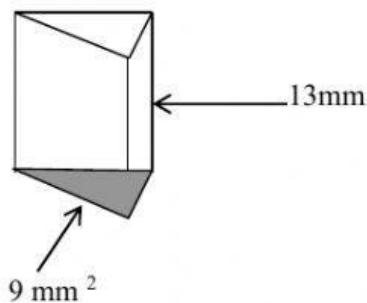

PRACTICE II

Volume of right prism = base area x height

Find the volume of each right prism.

1)

$$\text{Base area} = 9 \text{ mm}^2$$

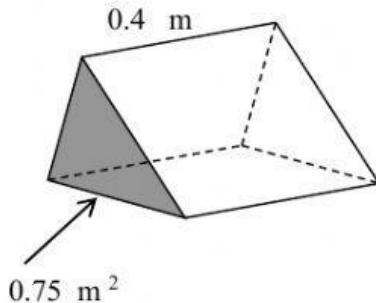

$$\text{Height} = 13 \text{ mm}$$

$$\text{Volume} = \text{base area} \times \text{height}$$

$$= 9 \text{ mm}^2 \times 13 \text{ mm}$$

$$= \underline{\hspace{2cm}} \text{ mm}^3$$

2)

$$\text{Base area} = 0.75 \text{ m}^2$$

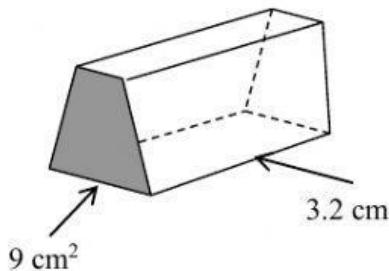

$$\text{Height} = 0.4 \text{ m}$$

$$\text{Volume} = \text{base area} \times \text{height}$$

$$= \underline{\hspace{2cm}} \times 0.4 \text{ m}$$

$$= \underline{\hspace{2cm}} \text{ m}^3$$

3)

$$\text{Base area} = \underline{\hspace{2cm}}$$

$$\text{Height} = \underline{\hspace{2cm}}$$

$$\text{Volume} = \text{base area} \times \text{height}$$

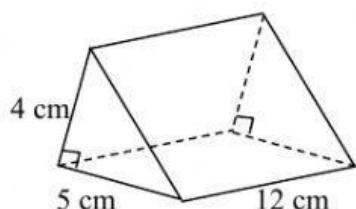

$$= \underline{\hspace{2cm}} \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{2cm}} \text{ cm}^3$$

PRACTICE III

Calculate the volume of the right prism given below.

1)

Area of triangle = $\frac{1}{2} \times \text{base} \times \text{height}$

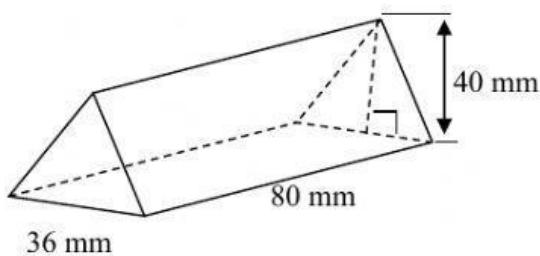

Shape of the base = a triangle

Base area = $\frac{1}{2} \times \underline{\quad} \times \underline{\quad}$

Height = 12 cm

Volume = base area \times height
 $= \underline{\quad} \times 12 \text{ cm}$
 $= \underline{\quad} \text{ cm}^3$

2)

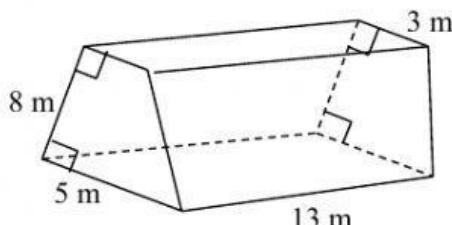

Shape of the base = _____

Base area = $\frac{1}{2} \times \underline{\quad} \times \underline{\quad}$
 $= \underline{\quad}$

Height = _____

Volume = base area \times height
 $= \underline{\quad} \times \underline{\quad}$
 $= \underline{\quad} \text{ mm}^3$

3)

Area of trapezium
 $= \frac{1}{2} (a+b)h$

Shape of the base = _____

Base area = $\frac{1}{2} \times (\underline{\quad} + \underline{\quad}) \times \underline{\quad}$
 $= \underline{\quad}$

Height = _____

Volume = base area \times height
 $= \underline{\quad} \times \underline{\quad}$
 $= \underline{\quad}$

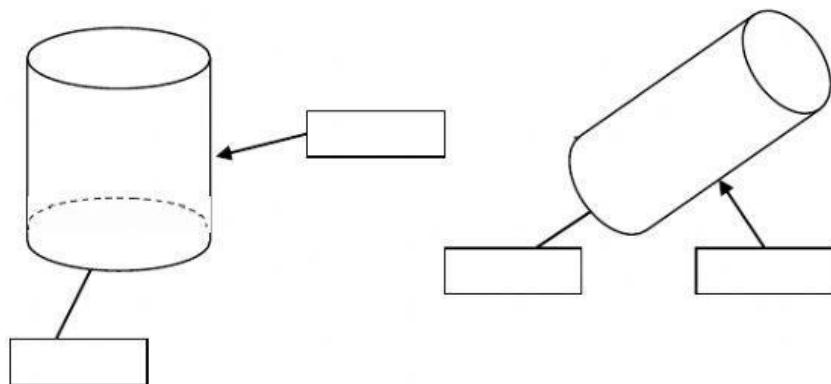

8.1d Volume of right circular cylinder.Learning Outcome:

To calculate the volume of right prism in cubic units given the height and

- the base area
- dimensions of the base

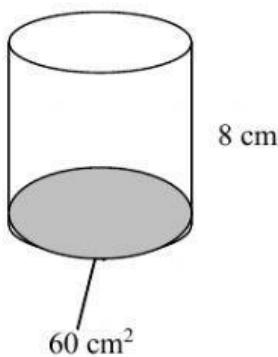

PRACTICE I

Identify the base, and the height of the right circular cylinders given below.

PRACTICE IICalculate the volume of the following right circular cylinders

Volume of right circular cylinder
 = base area x height
 = $(\pi r^2)h$

1.

$$\text{Base area} = 60 \text{ cm}^2$$

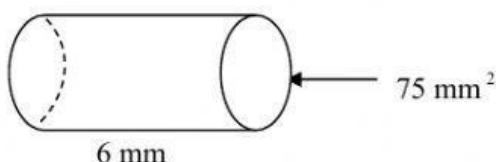

$$\text{Height} = 8 \text{ cm}$$

$$\text{Volume} = \text{base area} \times \text{height}$$

$$= \underline{\hspace{2cm}} \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{2cm}} \text{ cm}^3$$

2)

$$\text{Base area} = \underline{\hspace{2cm}}$$

$$\text{Height} = \underline{\hspace{2cm}}$$

$$\text{Volume} = \text{base area} \times \text{height}$$

$$= \underline{\hspace{2cm}} \times \underline{\hspace{2cm}}$$

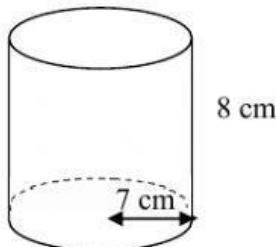

$$= \underline{\hspace{2cm}} \text{ mm}^3$$

PRACTICE III

Calculate the volume of the following right circular cylinders.

1.

$$\text{Area of circular base} = \pi r^2$$

$$= \frac{22}{7} \times 7 \times 7$$

$$\text{Height} = 8 \text{ cm}$$

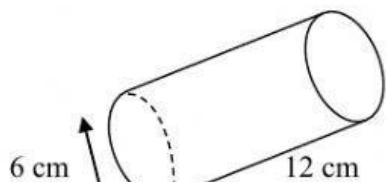

$$\text{Volume} = \text{base area} \times \text{height}$$

$$(\pi = \frac{22}{7})$$

$$= \frac{22}{7} \times 7 \times 7 \times 8$$

$$= \underline{\hspace{2cm}} \text{ cm}^3$$

2.

$$\pi = 3.142$$

Base diameter = 6cm, therefore radius = 3 cm

$$\text{Area of circular base} = \pi r^2$$

$$= 3.142 \times 3 \times 3$$

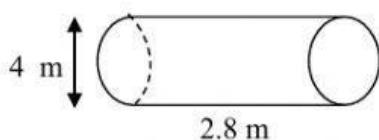

$$\text{Height} = 12 \text{ cm}$$

$$\text{Volume} = \text{base area} \times \text{height}$$

$$= \underline{\hspace{2cm}} \times \underline{\hspace{2cm}} \times \underline{\hspace{2cm}} \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{2cm}}$$

3.

$$(\pi = \frac{22}{7})$$

Base diameter = 4 m, therefore radius = m

$$\text{Area of circular base} = \pi r^2$$

$$= \frac{22}{7} \times \underline{\hspace{2cm}} \times \underline{\hspace{2cm}}$$

$$\text{Height} = 2.8 \text{ m}$$

$$\text{Volume} = \text{base area} \times \text{height}$$

$$= \underline{\hspace{2cm}} \times \underline{\hspace{2cm}} \times \underline{\hspace{2cm}} \times \underline{\hspace{2cm}}$$

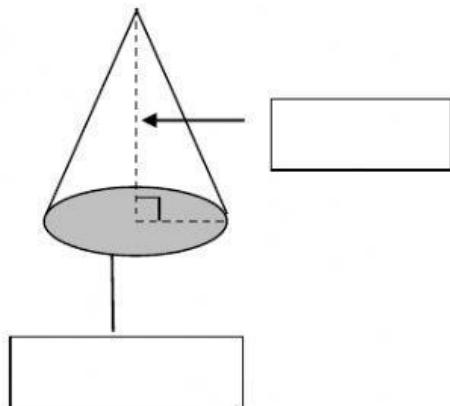

$$= \underline{\hspace{2cm}}$$

8.2d Volume of right circular cone.

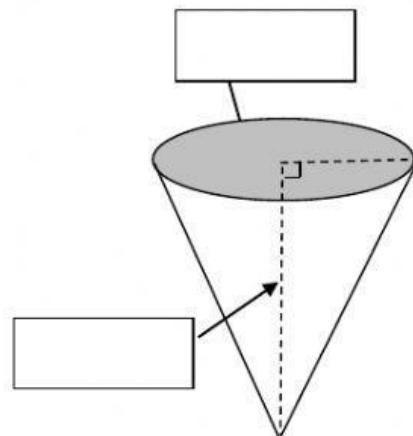

Learning Outcome:

To calculate the volume of a cone in mm^3 , cm^3 and m^3 , given the height and base radius.ACTIVITY IIdentify the base and the height of the right circular cones below.

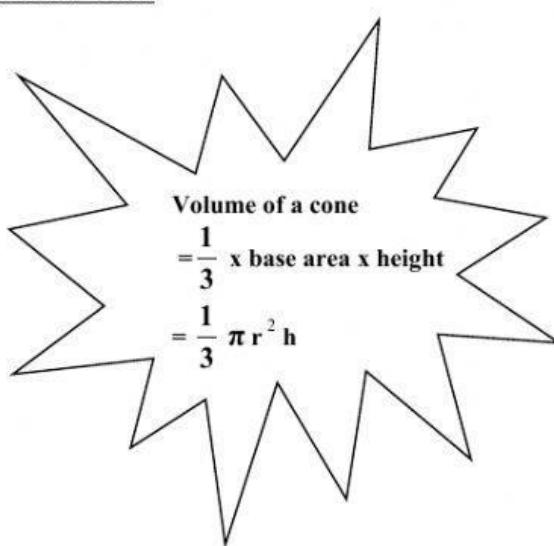

1.

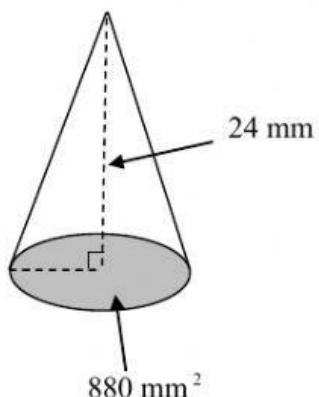

2.

PRACTICE IIFind the volume of each right circular cone.

—

1.

$$\text{Base area} = 880 \text{ mm}^2$$

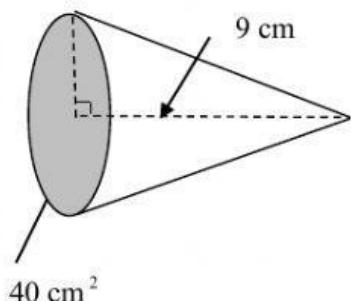

$$\text{Height} = 24 \text{ mm}$$

$$\text{Volume of the cone} = \frac{1}{3} \times \text{base area} \times \text{height}$$

$$= \frac{1}{3} \times 880 \text{ mm}^2 \times 24 \text{ mm}$$

$$= \underline{\hspace{2cm}} \text{ mm}^3$$

2.

$$\text{Base area} = 40 \text{ cm}^2$$

$$\text{Height} = \underline{\hspace{2cm}} \text{ cm}$$

$$\text{Volume of the cone} = \frac{1}{3} \times \text{base area} \times \text{height}$$

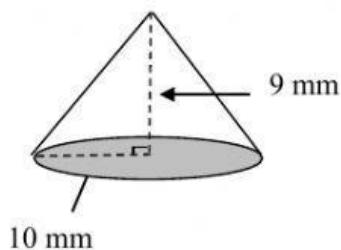

$$= \frac{1}{3} \times \underline{\hspace{2cm}} \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{2cm}}$$

PRACTICE III

Find the volume of the following right circular cones.

1.

$$(\pi = 3.142)$$

$$\text{Base radius} = 10 \text{ mm}$$

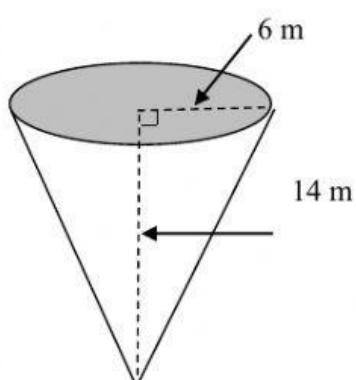

$$\text{Height} = 9 \text{ mm}$$

$$\text{Volume of the cone} = \frac{1}{3} \pi r^2 h$$

$$= \frac{1}{3} \times 3.142 \times 10 \times 10 \times 9$$

$$= \underline{\hspace{2cm}} \text{ mm}^3$$

2.

$$(\pi = \frac{22}{7})$$

$$\text{Base radius} = \underline{\hspace{2cm}} \text{ m}$$

$$\text{Height} = \underline{\hspace{2cm}} \text{ m}$$

$$\text{Volume of the cone} = \frac{1}{3} \pi r^2 h$$

$$= \frac{1}{3} \times \underline{\hspace{2cm}} \times \underline{\hspace{2cm}} \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{2cm}}$$
