

Resolver los Sistemas de Ecuaciones

1.
$$\begin{array}{r} 3x + 6y = 120 \\ 3x - 4y = 20 \end{array}$$
 } Resta

$$=$$
$$y =$$
$$x =$$

2.
$$\begin{array}{r} 15x + 16y = 108 \\ 24x - 9y = 69 \end{array}$$

$$\begin{array}{r} x \quad y = 864 \\ x \quad y = -345 \end{array}$$

$$=$$
$$y = \quad x =$$
