

Grade 9 Applied Stream

Summarise key findings from documents

Name:

Read the text and summarise the key findings using the 5 W's; (What, Where, Who, When, Why)

American **astronaut Scott Kelly** sent the world a message through Twitter in **February 2019**. His message said, 'First ever flower grown in space has appeared'. He also shared a picture of the flower.

Other plants such as lettuce and wheat have grown in space before, but this is the first time a flower has been grown. It is part of the **experiment to learn how flowers grow when there is no gravity**.

Scott Kelly is living on board the space station now, where the flower was grown. He will be there for six months. It's a long time to be away from the natural world.

Example:

Who? Astronaut Scott Kelly

When? February 2019

Remember the 5 W's:

What
Where
Who
When
Why

Where

Who

When

What

Why
