3. Read and complete the text. Look at the example.

Seahorses, fish, and starfish are very colorful. They are usually
 (a) more colorful than dolphins, whales, rays, and sharks.
 Octopuses can also be colorful (actually, they can camouflage), but
 they are (b) _____ the other three. Dolphins are
 not colorful, but they are
 (c) _____ any other marine animal, except for
 killer whales, which are also very intelligent and social. Dolphins are
 big, but killer whales are (d) _____ dolphins.
 Most sharks are (e) _____ killer whales, but
 unfortunately people think they are dangerous because they look
 scary. However, some rays and jellyfish are
 (f) _____ sharks because
 they are poisonous.

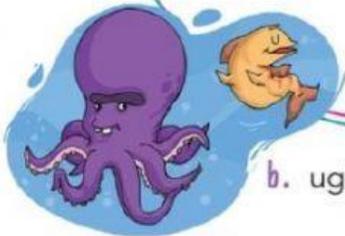

f. dangerous

b. sociable

a. colorful

b. ugly

e. small

d. big

4. Complete this diary entry.

bigger

smaller

faster

shorter

slower

I think nature is amazing! There is always a balance
 in nature. Seahorses are _____
 than lots of animals in the sea, but they have an
 awesome anatomy! I have a similar situation. I'm
 short: my legs are _____ than other
 girls' legs at school. But
 I'm _____ than them. I'm a good
 runner! Maybe my lungs are _____!
 Hmm, and I'm also a good swimmer, though I'm
 _____ than the girls. Maybe their
 arms and legs are stronger!
