

***. Choose the correct word in brackets:**

1. It's very hot inside (rivers – volcanoes – dams).
2. When water gets hot, it makes (ice – snow – steam).
3. Trees (absorb – generate – store) carbon dioxide.
4. They (didn't – isn't – aren't) playing computer games now.
5. A (polar environment – desert – rainforest) is very dry and has very little water.
6. Coal, gas and oil are (renewable energies – solar energy – fossil fuels)
7. Renewable energies don't make (electricity – pollution – power).
8. The High Dam stops the river Nile from (watering – generating – flooding).
9. We should (burn – plant – cut) trees. We need more trees everywhere.
10. A (rural - desert – urban) environment has lots of fields, farms, and villages.
11. The Earth is the (plane – planet – plant) where we live.
12. A (rural - mountainous – rainforest) environment is very high and difficult to travel around.
13. It's important to (protect – pollute – breathe) our environment.
14. There is a lot of snow and ice in the (urban – polar – rainforest) environment.
15. The rural environment is a (noisy – rocky – quiet) place to live.
16. There are a lot of buildings and traffic in the (polar – urban – mountainous) environment.
17. The urban environment is (densely populated – sparsely populated – empty).
18. Listen, they (talks – are talking – talking) about different environments.
19. An (rainforest - mountainous – urban) environment is noisy and has a lot of traffic and buildings.
20. (Does – Is – Are) Manar coming with us?
21. What did Mom (cook – cooks – cooking) yesterday?
22. We are (helped – help – helping) our environment to be a better place.
23. Solar energy can make clean (rain – electricity – wind).

*. Order the words to make correct sentences:

1. energy – make – A renewable – pollution – doesn't .

2. in – It's – rainforest – rainy – the .

3. dry – The – is – desert – very .

4. be – The – desert – hot – can – cold – or .

5. important – plastic – recycle – It's – to .

6. fantastic – a – is – Egypt – country .

*. Read the following text and then answer the questions below:

There are many types of environments on Earth, and we can use different natural resources in different places. For example, a hot desert is a good place to get solar energy from the sun, and there are large farms with lots of solar panels that can make clean electricity. A coastal environment can get a lot of wind, so some places have a lot of wind turbines in the sea, close to the coast. In some places where the sea goes up and down, we can use that strong tidal energy from the moving water to make electricity.

A. Choose the correct answer:

1. There are many types of (winds – tides – environments) on Earth.

2. A coastal environment can get a lot of (ice – snow – wind).

3. Hot desert is a good place to get (solar – wave – tidal) energy.

4. Solar energy can make clean (rain – water – electricity).

5. Some places have a lot of wind (turbines - panels – dams) in the sea, close to the coast.

*. Read and complete the text with the words in the box:

electricity – turbines – springs – steam

Iceland is a cold country, but it has more than 600 hot (1) and 200 volcanoes. There is a lot of hot water underground, and this is used to heat homes and to make electricity. When water gets hot, it makes (2) Engineers in Iceland can make holes down to the hot water underground. Then steam comes up and it moves (3) to make (4)

*. Read and complete the dialogue with the words in the box:

coastal – desert – environments – urban

Ehab : What are you doing, Fady?

Fady : I'm reading a book about different (1)

Ehab : What's your favorite environment?

Fady : The (2) environment because there are lots of buildings, clubs, parks and other interesting places. What about you?

Ehab : I like the (3) environment because I like living next to the sea.

Fady : I agree with you. I don't like the (4) environment because it's very hot and dry there.
