② Read and tick (✓) or cross (x).

① Coral reefs look like forests.

② A squid has got seven legs.

③ Jellyfish haven't got brains or bones.

④ Seals lay eggs.

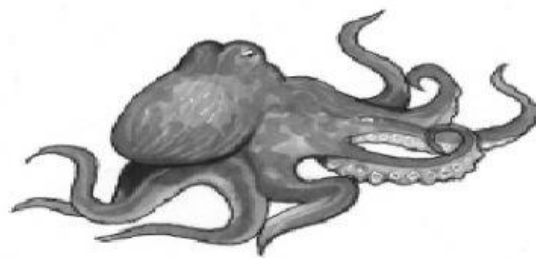

⑤ Lobsters have got a hard shell.

⑥ Crabs haven't got claws.

Octopus

The octopus is a strange animal because it has four pairs of arms. It can use its arms walk.

But it usually swims through the water.

They have got a but no bones!

..... bodies are really soft so they can easily swim through small spaces under

We found about 300 different kinds of octopus, but we are still new ones.

Many kinds only live about six months.

Others may live until they are about five years old. When an octopus is frightened it usually tries to hide.

Many can also colour so fish

..... are bigger or more dangerous won't catch them.

Have you ever an octopus?
