I can change back as a human only at night," explained Dewi Limaran. "The spell can be broken if I hear the melody from the holy gamelan," continued Dewi Limaran. The old woman then rushed to the palace. She talked to Prince Raden Putra about her wife. Prince Raden Putra was so happy. He had been looking for his wife everywhere.

Butterflies are a type of insect with large and often colorful wings. They start out as eggs. They lay their eggs on leaves. The eggs hatch into caterpillars with tubular body. The caterpillar eats leaves, buds, or flowers of plants. When a caterpillar is full sized, it goes into another stage called chrysalis. Caterpillars attach themselves to something solid before becoming a chrysalis. The caterpillar inside the chrysalis changes into a butterfly. Some butterflies make the change in one week. Some others take years to change. When the change is complete, the adult butterfly splits the chrysalis. The insect unfolds its wings and pumps blood and air into them.
