start computer	turn off computer	connect	save
look for open	download	type	send
copy	print	burn	delete

8.READING. READ THE TEXT BELOW AND DO THE EXERCISES.

A computer is a machine that can be programmed to manipulate symbols. A computer accepts data, stores it, processes and retrieves it when required and print the result in desired format.

Therefore computers perform complex and repetitive procedures quickly, precisely and reliably. Modern computers are electronic and digital. The actual machinery (wires, transistors, and circuits) is called hardware; the instructions and data are called software.

a. WRITE COGNATES FROM THE TEXT   B. FIND VERBS FROM THE TEXT AND COPY THEM
