### Task 3: listen again and fill the gaps

Energy is fundamental to human beings. Many poor people in developing countries do not have 1 ..... sources of energy like 2. ..... or natural gas, with which their lives can be improved.

People who live in mountainous areas have to gather wood for fuel. This takes a lot of time. For many people living in rural areas, 3..... is the largest energy resource available. The main use of biogas is for cooking and heating, but it can also provide energy for public transport. As biogas is smoke-free, it helps solve the problem of indoor air pollution. Moreover, it's made from plant waste and animal manure. They cost almost nothing.

The tendency to use 4..... energy sources in developing countries is on the increase as non-renewable ones are running out. In the future, the wind and the sun will be used as the most important environmentally friendly 5. ..... sources.
