

2. **Décompose** les nombres comme dans l'exemple et **entoure** ceux qui sont pairs.

12 $12 = (6 \times 2) + 0$	$9 = (\dots \times 2) + \dots$	$9 = (\dots \times 2) + \dots$	$7 = (\dots \times 2) + \dots$
$20 = (\dots \times 2) + \dots$	$15 = (\dots \times 2) + \dots$	$19 = (\dots \times 2) + \dots$	$4 = (\dots \times 2) + \dots$
$16 = (\dots \times 2) + \dots$	$14 = (\dots \times 2) + \dots$	$6 = (\dots \times 2) + \dots$	$11 = (\dots \times 2) + \dots$
$13 = (\dots \times 2) + \dots$	$17 = (\dots \times 2) + \dots$	$10 = (\dots \times 2) + \dots$	$0 = (\dots \times 2) + \dots$
$11 = (\dots \times 2) + \dots$	$2 = (\dots \times 2) + \dots$	$8 = (\dots \times 2) + \dots$	$5 = (\dots \times 2) + \dots$

3. **Ajoute ou retire** un nombre pour que le résultat soit un nombre pair.

$25 + \dots =$	$47 - \dots =$
$14 + \dots =$	$72 - \dots =$
$36 + \dots =$	$59 - \dots =$
$40 + \dots =$	$40 - \dots =$
$29 + \dots =$	$36 - \dots =$
$82 + \dots =$	$79 - \dots =$
$98 + \dots =$	$21 - \dots =$
$10 + \dots =$	$90 - \dots =$
$99 + \dots =$	$15 - \dots =$
$20 + \dots =$	$100 - \dots =$
$85 + \dots =$	$86 - \dots =$
$30 + \dots =$	$23 - \dots =$
	$44 - \dots =$
